

DESCRIPTION AND CONDITIONS OF THE BONUS BINARY MARKETING PROGRAM ON THE FORALLSTOCK PLATFORM

Bonus Binary System is designed to additionally encourage active Users participating in the advertising and marketing program for the development of the ForAllstock Platform.

Binary sector is a part of the main Marketing System of ForAllstock, designed for placing Tokens, corresponding to the denominations and categories obtained when purchasing PRO Packages.

▶ Together with the set of services, the PRO Package includes a Token corresponding to the par value of the purchased PRO Package (A Category PRO Package, costs 20 Euro, includes a Token of 20 Credits: **Package A = Token JA-20**).

Token is included in each PRO Package. Token cannot be bought or sold separately, without a package.

▶ Tokens are intended solely for placement in the Binary Sectors of the Marketing Program.

▶ Tokens of certain denominations and categories are placed strictly in Sectors of the same categories. For example, Tokens JA-20 can only be placed in Sector A. Tokens JC-180 can only be placed in Sector C.

▶ When placing Tokens in sectors and when certain combinations are formed, Credits are awarded to Tokens.

To receive rewards for passing each Sector by the Token, 7 combinations should be formed:

1 / 1; 3 / 3; 7 / 7; 12 / 12; 18 / 18; 24 / 24; 30 / 30.

For each Token, awards are credited in Credits in accordance with the terms of passing of each Sector.

ASSESSMENT OF REMUNERATION WHEN FORMING THE COMBINATIONS IN BINARY SECTORS

COMBINATIONS	SECTORS and repayments *in Credits					
	A	B	C	D	E	F
1 / 1	2	6	18	54	162	486
3 / 3	6	18	54	162	486	1458
7 / 7	14	42	126	378	1134	3402
12 / 12	24	72	216	648	1944	5832
18 / 18	36	108	324	976	2916	8748
24 / 24	48	144	432	1296	3888	11644
30 / 30	60	180	540	1620	4860	14580

▶ When forming the maximum combination from placement of Tokens in each sector (30 Tokens on top and 30 Tokens at the bottom), both one's own Tokens and those of other Users, the maximum reward is put on to the Token and the Start Position of the Token in the previous sector is considered to be closed.

Start Position is the the original location of the Token of the corresponding denomination placed in the corresponding Binary Sector from which the Binary branches are built.

▶ The Token moves to the Sector of the next category to the new Start Position. The Token's denomination is increased and a reward is credited onto it according to the conditions for the formation of the combination in the new sector.

Premium Extra-Tokens. During the passage of the Token of each Binary Sector A, B, C, D, E, F and with the formation of the combination: 12/12;

24/24, Token generates 2 Premium Extra-Tokens, which are automatically placed in the same Binary Sector.

▶ When the Token passes Sector F, the Starting Token Position is closed and the Token additionally generates one Premium Extra-Token in Sectors: A, B, C, D, E.

▶ Premium Extra Tokens are designed to accelerate the closure of this Sector and to create new starting positions for Premium Extra-Tokens.

▶ Premium Extra-Tokens are placed automatically in the Sector from the left to the right, from top to bottom to the first free space.

- ▶ Extra-Tokens can also form Sector combinations and a reward will be added to them as well, according to the conditions for the formation of combinations in this Sector.
- ▶ When forming the maximum combinations in each Sector (30/30), Extra-Tokens also move to the next Sector and increase their denomination.
Extra-Tokens when passing the Sectors do not generate new Extra-Tokens.
